DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 03/11/2008 has been entered.

2. The Amendment filed by Applicant on 03/11/2008 has been entered.

Response to Amendment/Arguments

3. Applicant's amendment and arguments filed on 03/11/2008 have been fully considered and they are found persuasive.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1796

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Masuda et al., EP 1 230 975 A1. See Examples 3 & 4. Masuda further asserts that greater than 80% of nitrile monomer is also desirable. See Masuda col. 3, paragraph 0012. Based on my calculation, the amount of acrylonitrile (150/250) is 71.4% based on the recipe found in Comparative Example 2. Furthermore, the specification teaches an amount of nitrile greater than 80% and the Applicant must demonstrate unexpected result for the claimed range.
